Ahmad Naser

DevOps & Cloud Engineer

Amman, Jordan | +962 79 087 4809 | ahmad.alnaser502@gmail.com | LinkedIn | GitHub | YouTube

PROFESSIONAL SUMMARY

DevOps & MLOps Engineer with 3+ years of experience in designing, automating, and managing scalable infrastructure across cloud and on-prem environments. I bridge the gap between software development, IT operations, and machine learning workflows to ensure reliable and efficient system delivery. Skilled in CI/CD, containerization, infrastructure as code, and AI model deployment, with hands-on experience in AWS and Azure. Passionate about automation, cloud-native technologies, and continuously improving deployment reliability and system performance.

PROFESSIONAL EXPERIENCE

Realsoft Advanced Applications Amman, Jordan

DevOps Engineer / System Administrator Aug 2022 – Present

Started as an intern and progressed into a full DevOps Engineer role, contributing to multiple production systems.

Key Achievements

- Designed and implemented CI/CD pipelines using Jenkins, improving deployment speed and reliability.
- Containerized applications using Docker and managed workloads via Docker Swarm and Kubernetes.
- Monitored systems using Prometheus and Grafana, reducing downtime through proactive alerting.
- Automated system tasks using Ansible and shell scripting, improving operational efficiency.
- Managed cloud infrastructure on Microsoft Azure and AWS.
- Automated infrastructure provisioning using Terraform on AWS environments.
- Fine-tuned and deployed AI models (ISIC / ISCO / ICD-10 classifiers) using Python and containerization.
- Delivered AZ-900 training workshops for the Ministry of Digital Economy, guiding participants on Azure fundamentals and cloud best practices.

Projects

- **Adaa Application**
  - Containerized services using Docker and managed deployments via Docker Swarm.
  - Integrated CI/CD pipelines using Git and TFS 2018.
- **Al-Khwarizmi Application**
  - Managed IIS-hosted applications and backend services using PM2.
  - Automated deployments via Jenkins for reliable and consistent updates.
- **RealData Portal**
  - Deployed and maintained cloud infrastructure on Microsoft Azure.
  - Optimized application performance and availability.

- **Sawtak Application**
  - Deployed Sawtak Application on AWS ECS and managed deployment workflows.
  - Managed MySQL databases and automated deployment workflows.
- **JMD Weather Data**
  - Administered Oracle Database and APEX environment.
- **AI Use Cases**
  - Fine-tuned and deployed AI models using Python and containerization.
  - Fine-tuned AI classifiers for ISIC / ISCO / ICD-10 coding using Python.
  - Fine-tuned AI classifiers for ISIC / ISCO / ICD-10 coding using Python.

TECHNICAL SKILLS

Cloud Platforms: AWS, Microsoft Azure
Containers & Orchestration: Docker, Kubernetes, Docker Swarm
CI/CD & Version Control: Jenkins, Git, GitHub Actions, TFS
Automation & Scripting: Bash, Python, Ansible
Infrastructure as Code: Terraform
MLOps & AI: LLM Fine-tuning, Containerized AI Deployments, Model Optimization
Monitoring: Prometheus, Grafana
Operating Systems: Linux, Windows Server
Databases: MySQL, Oracle
Networking: TCP/IP, DNS, VPN

EDUCATION

University of Jordan Amman, Jordan
Bachelor of Engineering in Electrical Engineering 2017 – 2022

- GPA: Very Good

CERTIFICATIONS & TRAINING

- Microsoft Azure Fundamentals (AZ-900)
- AWS Cloud Practitioner (CLF-C02)
- Microsoft 365 Fundamentals (MS-900)
- Google Generative AI Leader (GAIL)
- Training of Trainers (TOT)

LANGUAGES

Arabic: Native / Fluent
English: Intermediate (Improving toward professional proficiency)
